FACE THE UNPREDICTABLE

XDR

TEHTRIS XDR Platform

Interoperate your cybersecurity for augmented and hyperautomated remediation.

INDUSTRY RECOGNITION

TEHTRIS recognized as a Sample Vendor in the Gartner® Hype Cycle™ for Endpoint Security, 2023*.

Optimal reactivity, immediate information availability, exhaustive coverage…

Respond in real time to cyberattacks and orchestrate all your security tools within a single platform. With the **TEHTRIS XDR Platform**, get a global view of your assets, close collaboration between your teams and hyperautomate your responses to neutralize attacks 24/7.

- ↓ **Coordination** of all your cybersecurity solutions
- ↓ Detection and remediation **without human action**
- ↓ Cloud, systems, and networks **protection**
- ↓ **Centralized investigation** of your security events
- ↓ **Interactive dashboard** for accelerated information gathering
- ↓ **TEHTRIS augmented technology:** CTI, CYBERIA (AI, UEBA…) and SOAR
- ↓ **Modular** and **customizable** platform
- ↓ **Available in cloud & On-Premise**

Full visibility into your cybersecurity

24/7

Installed in your systems, networks, and cloud, the **TEHTRIS XDR Platform** unifies your cybersecurity solutions and your access control and identity management tools. A library of available APIs and connectors links your solutions to the **XDR Platform**. All metrics, alerts and events go back into the XDR for a holistic view of your IT assets.

Our artificial intelligence modules CYBERIA, CTI and SOAR increase your detection and response capabilities.

In the event of a security incident, investigate at 360° with the analytics tool (Cyber Warehouse) which centralizes all alerts and events from your cyber solutions. Use weak signals and detailed information, especially with our process tree, for an in-depth investigation.

Promote team collaboration and decision making

Engage your teams in collaborative work with the **TEHTRIS XDR Platform** and accelerate your response to cyberattacks. Create your investigation groups to form a shared workspace among analysts and save considerable time during incident response. The **XDR Platform** has enhanced filter management and co-editing capabilities to capitalize on the expertise of your teams and bring detailed analyses.

BENEFITS

- ▸ Global vision of your IS with a unified console
- ▸ 24/7 monitoring and protection of your IT assets
- ▸ Enhanced collaboration for increased responsiveness
- ▸ Integrated SOAR and playbooks creation (in No Code Automation)
- ▸ Easy integration with in & out APIs

Synergy of your solutions with the embedded SOAR

Orchestration of your cybersecurity solutions and automation of responses to cyberattacks have become essential. **TEHTRIS SOAR** and its customizable playbooks, hyperautomate your processes and remediations, including with your external solutions (such as Zscaler, Proofpoint...). Free your analysts from repetitive tasks so they can focus on priority cyber actions.

Unified monitoring and coordination of your solutions for hyperautomated incident detection and neutralization.

Customizable playbooks with TEHTRIS SOAR in No Code Automation, even on your external partner solutions (Zscaler, Proofpoint...).

Access to all TEHTRIS augmented intelligence: TEHTRIS CTI (Cyber Warehouse of several hundred million IoCs), CYBERIA Technology (artificial intelligence, innovative neural networks, behavioral analysis, intelligent support for your analyses: prioritization and grouping of alerts to shorten analysis time), Sandbox TEHTRIS...

In & out APIs for easy integration of TEHTRIS technologies into your ecosystem.

**Security alerts directly on your cell phone** with TEHTRIS MTD (customizable alert level).

Enhanced dashboards for a global view, with real-time analysis indicators to identify fleet risks. Pre-filtered dashboards are scalable, customizable, and exportable.

Configurable sandbox analysis and analysis reports with MITRE classification for greater contextualization.

Follow-up of the incident resolution via the dedicated ticketing tool, interfaced with your existing solution.
