

TEHTRIS OPTIMUS

Endpoint Detection & Protection

Gartner

*TEHTRIS recognized as a Representative Vendor in the 2021 Market Guide for Extended Detection and Response**

The innovation landscape is constantly evolving, and with it the challenges that organizations face.

Facing the multiplication of all forms of threats (ransomware, phishing...), organizations of all sizes and sectors must find ways to defend themselves. Acquiring an efficient, complete and automated security solution becomes the top priority.

TEHTRIS OPTIMUS combines EDR and NGAV (next generation anti-virus) capabilities in a single agent to autonomously detect the most advanced threats and instantly protect in real time your endpoints.

The alliance of the best technologies dedicated to endpoints

TEHTRIS OPTIMUS leverages on Cyberia artificial intelligence to detect known and unknown threats in real time. Integrated CTI provides unique monitoring, hunting and investigation capabilities for accurate and broad endpoint visibility.

In remediation mode, the **TEHTRIS OPTIMUS** agent blocks known signatures, identifies malicious behavior, and neutralizes automatically unknown threats.

Optimal, intuitive and integrated protection

Organizations need high-performance security, adapted to their ecosystem, with simplified and rapid deployment.

TEHTRIS OPTIMUS is designed to provide them with a functional, efficient and autonomous solution. Configurations are pre-integrated for easy installation and APIs allow seamless integration with existing solutions, such as EPP. Experience is optimal, from start to finish.

Highlights

- Combination of EDR & NAGV technologies for autonomous and intelligent protection
- Increased detection & neutralization of attacks in real time thanks to TEHTRIS Artificial Intelligence
- Access to TEHTRIS XDR Platform
- Available on SaaS
- Optimal protection on all supported OS

Advantages

- + One single TEHTRIS agent
- + Turnkey solution
- + 360° intervention and monitoring of your endpoints
- + Easy deployment and use
- + Easy and intuitive user experience
- + Integrated to the client's ecosystem

* Gartner Market Guide for Extended Detection and Response, Craig Lawson, Peter Firstbrook, Paul Webber, 8 November 2021

KEY FUNCTIONALITIES

ENDPOINT DETECTION

- Real-time detection of security incidents on your endpoints
- Investigation & IOC Hunting
- Whitelist and blacklist mechanisms
- Endpoint vulnerability audit
- Shadow IT: detection of unprotected endpoints

ENDPOINT PROTECTION

- Increased detection of advanced and unknown attacks in real time
- Autonomous remediation & neutralization capability
- Malware quarantine
- Dashboarding and reporting (thanks to APIs)

INDUSTRIALIZED & INTEGRATED SOLUTION

- Compatibility with the client's ecosystem and existing EPP
- Easy deployment and use
- TEHTRIS pre-configurations
- Visual and intuitive console
- External APIs

Supports all the OS of your IS

macOS

macOS Catalina
macOS High Sierra
macOS Sierra
macOS Mojave

Windows 10
Windows 8
Windows 7
Windows Server 2003
.....
Windows Server 2019

CentOS Linux 5.11
CentOS Linux 5.3
CentOS Linux 6.9
CentOS Linux 7.5
Ubuntu Linux 14.04
.....
Ubuntu Linux Hardy

Thanks to the combination of:

- The TEHTRIS CTI (about hundred million IoC data warehouse)
- TEHTRIS sandboxes
- More than 15 detection engines (signatures database)
- Innovative neuronal networks (Cyberia)
- A behavioral analysis module

**MITRE
ATT&CK™**

TEHTRIS XDR Platform
is 100% compatible with
MITRE ATT&CK

**TEHTRIS is rating 5/5 by
our clients**

On 22.02.2022, TEHTRIS has obtained the global rating of 5/5 on the endpoint detection and response market - based on 14 reviews.

Recognized expertise

About TEHTRIS

TEHTRIS is a cybersecurity expert and publisher of the cyber defense solution, TEHTRIS XDR Platform, serving many industries in France and abroad. Our artificial intelligence-based solutions are designed to automatically detect and neutralize advanced threats such as cyber espionage or cyber sabotage activities in real time.
