TEHTRIS
FACE THE UNPREDICTABLE

Security Orchestration, Automation & Response

NO CODE AUTOMATION TO ORCHESTRATE AND OPTIMIZE YOUR CYBERSECURITY

SOAR

Security Orchestration, Automation & Response

Every minute and every action counts in the face of a cyberattack. Speed of response is critical: your teams need to have the tools to make the best decisions to protect your infrastructure.

Gartner

*TEHTRIS recognized as a Representative Vendor in the 2021 Market Guide for Extended Detection and Response.**

- **Immediate availability** (integrated to the XDR Platform)
- **Intuitive** and **configurable Playbooks**
- **Facilitated interconnection**
- **Integrated with TEHTRIS XDR** partner solutions

No Code Automation to orchestrate and optimize your cybersecurity

Maximize responsiveness, automate processes and remediation:

The **TEHTRIS SOAR** Orchestrator provides additional means for your teams to automatically respond to incidents, while boosting the performance of your security solutions.

Orchestration, Automation & Response
24/7

With TEHTRIS SOAR, your analysts focus on the essentials.

TEHTRIS SOAR

Gain decisive seconds in response to attacks

Automated responses are now essential to ensure your defense against blitz attacks. **TEHTRIS SOAR** maximizes the effectiveness of your solutions in the face of a known or unknown threat by industrializing your security procedures. It saves even more time for your teams, by enabling simplified and automated orchestration of your threat detection tools. **TEHTRIS SOAR** combined with **CYBERIA** artificial intelligence, accelerates detection, contextualization and response to threats (neutralization or further investigation), for immediate reactivity to cyber security incidents.

TEHTRIS SOAR Playbooks: orchestrate your cybersecurity solutions

Create synergy between your cybersecurity tools and augment performance in incident management with **TEHTRIS SOAR** playbooks. Its intuitive interface gives you access to a playbook editor, in No Code Automation, and a set of templates for a quick start.

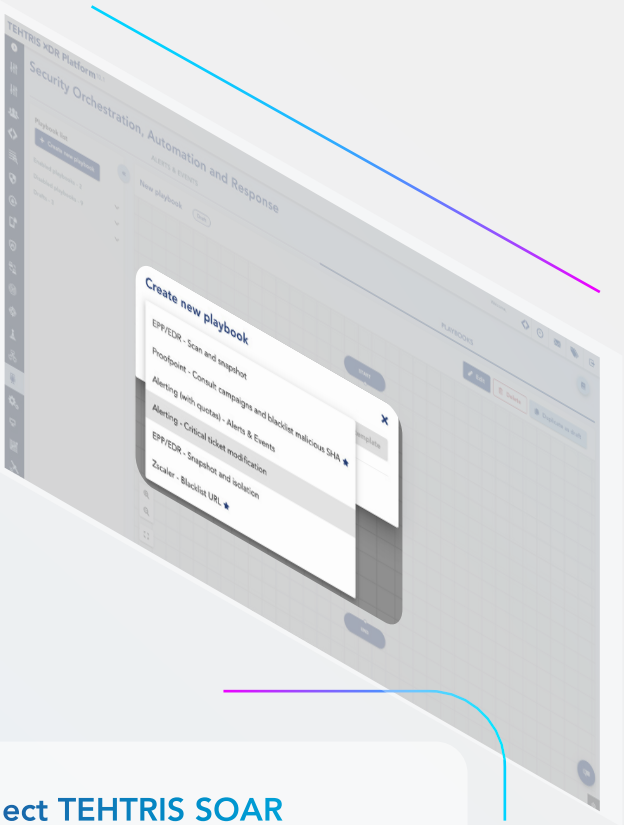
The scenarios are fully customizable to fit the security needs of your infrastructure. Entrust repetitive tasks to SOAR and accelerate the decision making of your analysts.

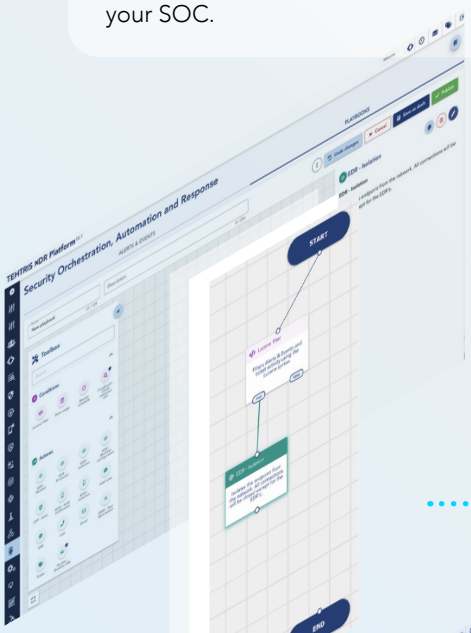
BENEFITS

- Efficiency and time saving
- Orchestrated and unified cybersecurity
- Accelerated decision making
- Optimized alerting and customizable
- Creation of cybersecurity scenarios
- Automation of incident response processes

Synergy of your solutions for faster decision making

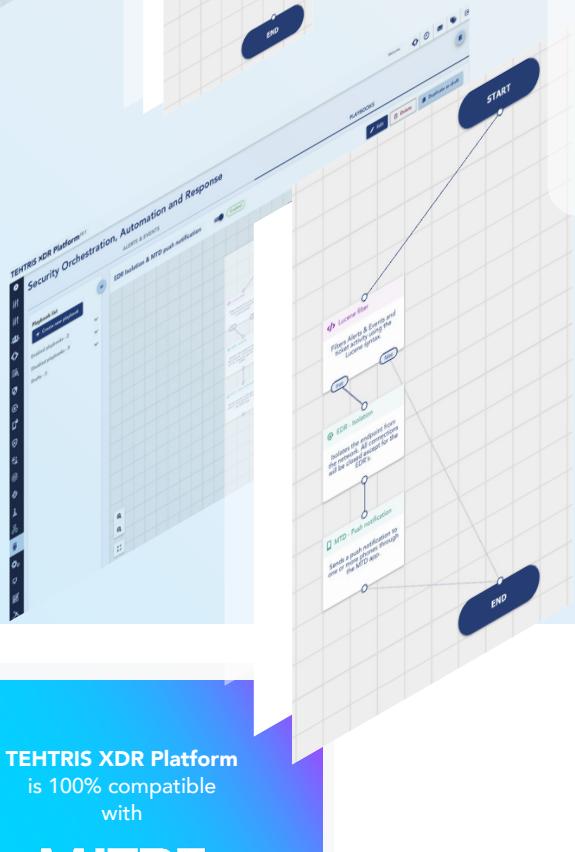
The **SOAR** integrated with the **TEHTRIS XDR Platform** allows your solutions to interact for holistic management of your cyber tools. Incident contextualization, alerting and remediation playbooks... accelerate the decision making of your SOC.

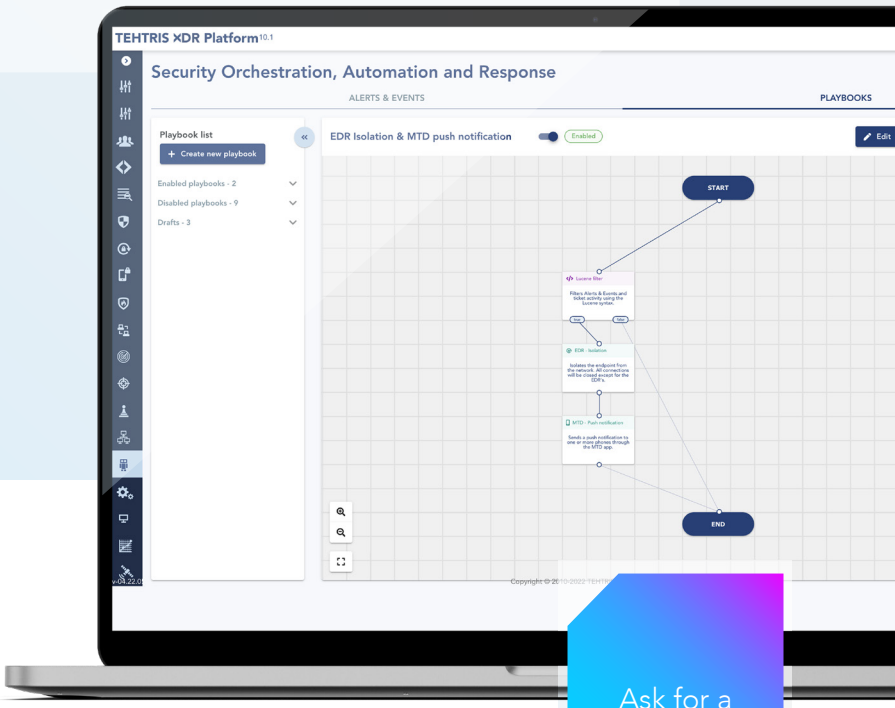




Save time: connect TEHTRIS SOAR to all your solutions

TEHTRIS SOAR orchestrates also your external tools (such as Zscaler, Proofpoint...). All your playbooks created with the SOAR can include the partner solutions of the **TEHTRIS XDR Platform**, to enrich your catalog of actions and ensure optimal protection of your infrastructure.





TEHTRIS XDR Platform is 100% compatible with MITRE ATT&CK®
