

FACE THE UNPREDICTABLE

Press release

## **TEHTRIS, the French publisher of the cyber defence solution TEHTRIS XDR Platform, obtains ISO 27001 certification.**

*ISO 27001 certifies the level of TEHTRIS' information security management system,  
applied to the TEHTRIS XDR Platform and all associated products.*

**Paris, October 25, 2022 - TEHTRIS, the French publisher of the TEHTRIS XDR Platform and technological leader against cyber espionage and cyber sabotage, has obtained ISO 27001 certification for the TEHTRIS XDR Platform and its associated products. This certification was issued by AFNOR, the French Association for Standardisation.**

TEHTRIS develops and markets the TEHTRIS XDR Platform (eXtended Detection and Response) cyber defence solution that detects and neutralises known and unknown cyber threats in real-time and without human action in companies and administrations. This cyber defence solution is interoperable for enhanced and hyper-automated remediation.

2009/102155

The international reference standard ISO 27001 certifies that TEHTRIS implements best practices in terms of information security through its Information Security Management System (ISMS). It ensures that the processes deployed within the TEHTRIS XDR Platform comply with the applicable standards and requirements for governance, data protection and IT asset security. This certification reflects TEHTRIS' concern for the security, availability, integrity and confidentiality of its data as well as that of its customers.

*"We are delighted to have obtained ISO 27001 certification, which confirms the quality of our project management, our processes and our technical operations around our TEHTRIS XDR Platform products and infrastructures, from the initial deployment to the daily management. This guarantee of confidence in terms of quality and cybersecurity, obtained from AFNOR, will serve as a pillar in our relations with our customers and partners, in France, in Europe and internationally,"* says Laurent Oudot, co-CEO & CTO of TEHTRIS.

The certification, which is granted for a period of three years, increases the confidence of stakeholders in the deployment and maintenance of TEHTRIS products.

FACE THE UNPREDICTABLE

**About TEHTRIS** (<https://tehtris.com>)

Founded in 2010, TEHTRIS is the publisher of the TEHTRIS XDR Platform, a world leader in the automatic, real-time, non-human neutralization of cyber attacks. With its "Security & Ethics by design" engineering, this solution provides cybersecurity specialists with a holistic view of their infrastructure, while guaranteeing the confidentiality of their data. The TEHTRIS XDR Platform is interoperable with existing security solutions through its APIs and integrated orchestrator. Thanks to its technology, the company is positioned as a European trusted third party. Together with its international partners, TEHTRIS XDR Platform monitors, analyses, detects and neutralises threats worldwide for the benefit of major players in industry, transport, engineering, services and government. TEHTRIS is constantly on the lookout for cybercrime and listens to its customers, helping them to reduce risks as much as possible and to deal with the unexpected. TEHTRIS raised a record €20 million in Series A funding from industry investors in November 2020 and €44 million in a second fundraising in October 2022. TEHTRIS is recruiting to accelerate its development and continue its technological research strategy.
